

Table 1. Sterrhinae tribes and a tentative list of their constituent genera. Estimated numbers of species are given in parentheses following the tribal names, and for taxa of uncertain association in square brackets. Estimates are taken from Scoble (1999). The genera studied are marked with an asterisk. The tribal association of those genera not studied here is taken from the literature as indicated. At the end of each generic list are the genera whose tribal association is uncertain. At the end of the table is a list of genera which have been associated with Sterrhinae, but whose systematic position is uncertain. Scoble (1999) listed *Parapychodes* Warren in Sterrhinae, but based on a detailed examination of structures, we place this genus in Diptychinae following Vári *et al.* (2002).

Tribe (species)	Genera
Cosymbiini (515)	<i>Anisephyra</i> Warren (Hausmann, 1998), <i>Bytharia</i> Walker (Holloway, 1997), <i>Chlorerythra</i> Warren (Hausmann, 1993a), <i>Chrysocraspeda</i> Swinhoe (Holloway, 1997), <i>Cyclophora</i> Hübner*, <i>Mesotrophe</i> Hampson (Holloway, 1997), <i>Perixeria</i> Meyrick (Holloway, 1997), <i>Pleuroprucha</i> Möschler (Hodges <i>et al.</i> , 1983), <i>Pseudosterrha</i> Warren (Hausmann, 1993a), <i>Ptomophyle</i> Prout (Prout, 1929–35), <i>Zeugma</i> Walker (Holloway, 1997).
Cosymbiini of uncertain association [170]	<i>Hemipterodes</i> Warren (Prout, 1935–38), <i>Lipotaxia</i> Prout (Prout, 1935–38), <i>Prasinochrysa</i> Warren (Prout, 1935–38), <i>Semaopus</i> Herrich-Schäffer*, <i>Trygodes</i> Guenée*.
Cylopodini (68)	<i>Atyria</i> Hübner (Covell, 1983), <i>Atyriodes</i> Warren (Covell, 1983), <i>Cylopodia</i> Dalman*, <i>Formiana</i> Druce (Covell, 1983), <i>Paratyria</i> Warren (Covell, 1983), <i>Smicropus</i> Warren (Holloway, 1997), <i>Xanthyrus</i> Felder & Felder (Covell, 1983).
Cylopodini of uncertain association [7]	<i>Myrice</i> Walker (Prout, 1935–38), <i>Oncopus</i> Herrich-Schäffer (Prout, 1935–38).
Rhodometrini (16)	<i>Casilda</i> Agenjo*, <i>Rhodometra</i> Meyrick*.
Rhodometrini of uncertain association [1]	<i>Ochodontia</i> Lederer*.
Rhodostrophiini (185)	<i>Anthemoctena</i> Warren*, <i>Apostates</i> Warren (Viidalepp, 1996), <i>Apostegania</i> Prout (Holloway, 1997), <i>Discoglypha</i> Warren (Prout, 1934–39), <i>Discomiosis</i> Prout*, <i>Dithecodes</i> Warren (Nakamura, 1994), <i>Erythrolophus</i> Swinhoe (Holloway, 1997), <i>Metallaxis</i> Prout (Holloway, 1997), <i>Neonemoria</i> Warren (Prout, 1935–38), <i>Organopoda</i> Hampson (Holloway, 1997), <i>Pseuderythrolophus</i> Prout (Prout, 1920–41), <i>Pylargosceles</i> Prout (Nakamura, 1994), <i>Rhodostrophia</i> Hübner*, <i>Symmacra</i> Warren (Holloway, 1997), <i>Tanaotrichia</i> Warren (Prout, 1912–16), <i>Tricentra</i> Warren (Prout, 1935–38), <i>Zalisseolepis</i> Warren (Prout, 1935–38).
Rhodostrophiini of uncertain association [16]	<i>Craspediopsis</i> Warren*, <i>Lissoblemma</i> Warren*, <i>Orthoserica</i> Warren*, <i>Palaeaspilates</i> Warren*, <i>Tricentroscelis</i> Prout*.
Scopulini (912)	<i>Aletis</i> Hübner*, <i>Antilycauges</i> Prout*, <i>Antitrygodes</i> Warren*, <i>Autaneptis</i> Turner*, <i>Cartaletis</i> Warren*, <i>Cinglis</i> Guenée*, <i>Dasybela</i> Turner*, <i>Dithalama</i> Meyrick*, <i>Epicosymbia</i> Warren*, <i>Glossotrophia</i> Prout*, <i>Ignobilia</i> Prout*, <i>Isopenia</i> Warren*, <i>Isopenodia</i> Prout*, <i>Leucoxena</i> Warren*, <i>Lipomelia</i> Warren*, <i>Lophosis</i> Hulst (Hodges <i>et al.</i> , 1983), <i>Oar</i> Prout*, <i>Problepsis</i> Lederer*, <i>Pseudocinglis</i> Hausmann*, <i>Scopula</i> Schrank*, <i>Scopuloides</i> Hausmann*, <i>Somatina</i> Guenée*, <i>Stigma</i> Alphéraky*, <i>Zygophyxia</i> Prout*, <i>Zythos</i> Fletcher*.
Scopulini of uncertain association [78]	<i>Acratodes</i> Guenée*, <i>Crypsityla</i> Warren*, <i>Haemalea</i> Hübner*, <i>Leptostales s.str.</i> Möschler*, <i>Proutoscia</i> Schaus*, <i>Pseudasellodes</i> Warren*.
Sterrhini (825)	<i>Anthometra</i> Boisduval (Leraut, 1997), <i>Arcobara</i> Walker*, <i>Brachyglossina</i> Wagner (Viidalepp, 1996), <i>Cleta</i> Duponchel (Viidalepp, 1996), <i>Emmiltis</i> Hübner (Leraut, 1997), <i>Epicleta</i> Prout (Prout, 1929–35), <i>Euacidalia</i> Packard (Hodges <i>et al.</i> , 1983), <i>Eueupithecia</i> Prout (Prout, 1910), <i>Eumacrodus</i> Warren (Hodges <i>et al.</i> , 1983), <i>Eupithecia</i> Hampson (Prout, 1920–41), <i>Idaea</i> Treitschke*, <i>Limeria</i> Staudinger (Viidalepp, 1996), <i>Lobocleta</i> Warren (Hodges <i>et al.</i> , 1983), <i>Lophophleps</i> Hampson (Holloway, 1997), <i>Odontoptila</i> Warren*, <i>Paota</i> Hulst*, <i>Protoproutia</i> McDunnough (Hodges <i>et al.</i> , 1983), <i>Ptychamalia</i> Prout*, <i>Tineigidia</i> Sterneck (Hacker & Hausmann, 1999).
Sterrhini of uncertain association [36]	<i>Aphanophleps</i> Warren (Warren, 1906), <i>Lycaugidia</i> Hampson (Prout, 1929–35), <i>Notiosterrha</i> Prout (Prout, 1920–41), <i>Stenorrhoë</i> Warren (Warren, 1900), <i>Tricentrogyna</i> Prout (Prout, 1932), <i>Trichosterrha</i> Warren (Prout, 1935–38).
Timandrini (45)	<i>Haematopis</i> Hübner (Hodges <i>et al.</i> , 1983), <i>Synegiodes</i> Swinhoe (Holloway, 1997), <i>Timandra</i> Duponchel*, <i>Traminda</i> Saalmüller*.
Position uncertain (9)	<i>Chorizomena</i> Turner (?Sterrhini, Nielsen <i>et al.</i> , 1996), <i>Dualana</i> Strand (possibly related to <i>Tricentroscelis</i> Prout, Prout, 1934–35), <i>Neothysanis</i> Dognin* (?Sterrhini).
